NOW'S THE TIME

SWAT THE BUG WHILE THERE'S A CHANCE TO WIN.

PREVENTATION IS BEST

Crop Rotation and Thorough Cultivation Lessens Danger—Formulas Effective in Eliminating Insects.

Following a rather open winter it is probable that insects may prove troublesome in the home garden and in truck patches. The following list of standard formulas, as recommended by various agricultural experiment stations, is sent out by the Missouri State Board of Agriculture at Columbia.

Kerosene Emulsion—Kerosene (coal oil), 2 gallons; rain water, 1 gallon; soap $\frac{1}{2}$ pound. Boil the soap in water until dissolved. While the mixture is boiling hot, turn it into the kerosene, stir for about five minutes and until it is of a smooth, creamy nature. Before using, dilute with nine times its measure of water. Three gallons of emulsion will make thirty gallons of wash.

Soap Wash—Concentrated potash lye, $\frac{3}{4}$ pounds; water, $\frac{7}{8}$ gallons; fish oil, 1 gallon. Dilute the lye in water; boil. To the boiling solution add the fish oil. Continue to boil for two hours and then allow to cool.

Carbolic Acid Emulsion—Carbolic acid, 1 pint; hard soap, 1 pound; water, 1 gallon. Dissolve the soap in the boiling water and while boiling add the acid and continue the boiling for a few minutes, stirring thoroughly. Put the emulsion away in a tightly closed vessel and label, "Stock Solution of Carbolic Acid—Poison." Before using, dilute one part of the stock solution with fifty parts of water.

Carbolized Plaster—Carbolic acid, 1 pint; air slacked lime, road dust, or some other diluting medium, 50 pounds. Sprinkle or dust on the plant in the dry state.

Tobacco Spray—Hard soap, 1 pound; water, 8 to 10 gallons, strong tobacco extract, 1 gallon. Dissolve the soap in boiling water, add the decoction and then make up 8 to 10 gallons.

White Hellebore—This is a powder which may be obtained at any drug store. The powder may be used with water. Where water is used, 1 ounce to 2 gallons of warm water is the proper proportion.

Pyrethrum of Insect Powder—This powder is also called Dalmatian Insect Powder and Persian Insect Powder. Like Hellebore, it is obtained from plants. To be effective, the powder must be fresh. Where used in the liquid form, use 1 ounce to 3 gallons of water. In the dry form use 1 ounce to 5 ounces of cheap flour. Mix thoroughly, allowing it to stand overnight in a closed tin box, then dust on the plants through a cheese cloth.

Poisoned Bran Mash—Mix $\frac{1}{2}$ pound of Paris green in 50 pounds of bran. The poison should be added to the dry bran little by little and stirred all the time until the mass is tinged with the green color. Then add water, sweeten with sugar or molasses until the mixture is sufficiently moistened to crumble nicely through the fingers.

Paris Green and Bordeaux Mixture—4 pounds of fresh lime, 4 pounds of bluestone and 4 ounces of Paris Green. Thoroughly mix in 40 gallons of water. The bluestone (copper sulphate) should be dissolved by suspending it in a wooden vessel containing four or five gallons of water, and the lime slaked in another vessel. If lumpy, the lime should be strained through coarse sacking. Pour the bluestone into a barrel and half fill with water. Dilute the slaked lime to a half barrel and mix the two together. The Paris Green should be made into a paste with warm water, poured into the barrel and stirred thoroughly. The mixture is then ready for use. The addition of the lime prevents the poison from scorching the foliage.

Arsenate of Lead—Arsenate of soda, 10 ounces; acetate of lead, 24 ounces; water, 150 to 200 gallons. The arsenate of soda and the acetate of lead

GIRLS ARE SHORT BANQUET TONIGHT

NOT IN STATURE, BUT IN NUMBER ENUMERATED.

TOTAL DECREASE 34

Over Half of Total White Females—Decrease in Colored Children Accounted for by One Family.

The enumeration of the school children of the ages from 6 to 20 of the Maryville school district has just been completed by J. W. Ray and shows that there are 1,212 school children. As compared with the enumeration of 1912, it is a decrease of 34, as the enumeration for 1912 was 1,246.

The number of white males are 587, the number of white females 594. The number of colored males are 11, and the colored females are 20. As compared with 1912, the white males were 592, or an increase of five over this year, and the white females were 612, or an increase of 18 over this year. The colored enumeration also fell off this year, being 31 as compared to 42 in 1912. One reason for the decrease in colored enumeration is that the Page family composed of twelve children have moved away from the city.

The first suit says that the plaintiffs entered into a contract of purchase and did buy of the defendant a number of acres of land and paid \$24,076, or \$107 for 225 acres of land. The petition alleges that the survey was made inaccurate and was only approximate and because of the mistake and misinformation as to the correctness of the survey, the plaintiffs overpaid defendant in the sum of \$280.50. This amount is asked for. There is also a second count in the petition filed for \$280.50.

The second suit filed was by the First National realty and loan company and James L. Ballard against Mr. Mason. POLITICAL NOTES.

Governor Major was raised on a Missouri farm and still prefers to travel behind a good team, hence his action in vetoing the appropriation of \$4,000 for an automobile for his personal use.

Predictions of good crops and continued prosperity except those of our Republican friends who warned the country last fall that everybody would have to go to the poor house if a Democratic president and Congress should be elected.

President Wilson was the first chief executive of any nation to recognize the Chinese Republic and extend to it the glad hand. It is the Democratic way. The Taft administration should have done this duty and would have done it but for the fact that American bankers wanted action deferred until a certain unsavory financial deal could be put through.

More money will be spent for schools and roads in Missouri during the next two years than during any other like period in the state's history, and all this without any increase in the rate of taxation. The Democratic party always has made good.

That noise you hear, Bill, is an echo from Armageddon. A gentleman by the name of Roosevelt is disturbing the peace of that famed resort because his hand-made political organization is being swallowed up—body boots and breeches—by tariff barons and other malefactors of great wealth.

One of the Journal's exchanges says that about all that is now left of the third term candidate for president, Col. Theodore Roosevelt, is wind and teeth. The teeth are left all right, but the wind was completely knocked out of him by the votes at the recent election.—Hopkins Journal.

Mrs. Will Clemmons of Arkoe was in Maryville Wednesday.

City Federation Meeting.

The first meeting of the City Federation of Women's clubs since its organization a month ago was held at the library on Wednesday afternoon and plans discussed for the future work. The constitution and by-laws drafted by the committee, Mrs. W. B. Christy, Mrs. E. G. Orear and the federation president, Mrs. W. A. Rickenbrode, were ready and unanimously adopted. The Chairmen for three standing committees were appointed by the president; Mrs. Christy for the philanthropic work, Mrs. Eugene Ogden for the home economics, and Mrs. G. H. Colbert for the civics work. The report given by Mrs. Colbert of an address on civic improvement at the state meeting in Columbia last week by Mrs. Baxter of Kirksville was inspiring to the new federation and brought out an interesting discussion. It was decided to try to secure Mrs. Baxter to deliver an address in Maryville. Kirksville is said to have made greater improvement along civic lines than any other town in the state and Mrs. Baxter has been the prime factor in the work. She is a successful speaker and worker, and is busy most of the time delivering speeches in Missouri and other states, telling how work along civic lines may be accomplished.

Middleton-Cole Wedding.

The marriage of Miss Jane Cole of Parnell and J. Clyde Middleton of this city took place at 7:30 o'clock Wednesday evening, May 14, at the home of the groom's father, Isaac Middleton, 1302 East First street, in the presence of quite a number of relatives and friends. The bride was prettily attired in a dress of blue silk and she carried a bouquet of bride roses. A luncheon was served after congratulations from the guests, and during the social time that followed some excellent music was given by a five-piece orchestra composed of James, Albert and Charles Conklin, Albert Kane and Tom McMullen. The members of the orchestra also sang several songs, among them "Silver Threads Among the Gold," "Silvery Moon," and "Blue Bells of Scotland." Just before the wedding company dispersed the bride and groom were serenaded by about thirty of their friends from around town. What Excitement at Home

Our child is about to graduate. Preparations are being made for a general rejoicing, and now you parents are considering the subject of a suitable present to show how you appreciate your child's hard work.

We again will help you with a few suggestions, which we know he or she will approve of, and feel amply rewarded for their many hours of hard work.

A diamond set in a pretty gold ring would be very fine, but if you do not feel quite so opulent, a watch would doubtlessly give just as much pleasure.

We have many other suitable articles too numerous to mention, and a visit to our store will tell the tale.

Tea for Pickering Mothers' Club.

One of the nicest social affairs Pickering has had for some time was the tea given Tuesday afternoon from 3 to 4 o'clock by Mrs. C. G. McMillen on the lawn of her home to the Mothers' club and their friends at that place. Rugs, pillows and seats were arranged on the lawn for the comfort of the guests. Upon their arrival, Mrs. McMillen, assisted by Mrs. Gordon Swinford, Mrs. Lester Hood, Mrs. Ed Rickard, Mrs. Ben Ingles, Mrs. Henry Rutherford, Mrs. John McQuire, served tea and cakes from the small tables upon which dominoes were played during the afternoon. Kodak pictures of the guests were taken and also of the children present. Mrs. McMillen threw a generous supply of candy upon the lawn for the benefit of the children, who accompanied their mothers. A silver offering was taken and this will be applied to the equipment of the play grounds that the Mothers' club has just started a fund for, and a good sum was realized. The tea was given for that purpose and the club is grateful to Mrs. McMillen for the effort she made in starting the ball to rolling. All of the members of the club were present and each brought a guest, while the hostess invited several for the afternoon. The singing of Mrs. Roy Wolfers at various times was one of the pleasant features of the day. The officers and members of the club are as follows: Mrs. Howard Wray, president; Mrs. D. R. Crowder, first vice-president; Mrs. W. R. McKee, second vice-president; Mrs. John McGuire, secretary; Mrs. George Smith,

(sugar of lead) should be dissolved separately and then poured into a tank containing the required amount of water. A white precipitate of lead arsenate is immediately formed, and when thoroughly stirred is ready for spraying. Its finely divided condition keeps it in suspension for hours and thus simplifies the work of spraying.

Common Insects.

Cut Worms—Cut worms do most damage to plants soon after they are set out in the spring. They also get in their work in June and July, there being several kinds of cut worms. The best way to get rid of the worms is to sprinkle poison mash over the ground about sundown. In setting out tomato plants a piece of paper wrapped about each plant so as to extend slightly beneath the soil and an inch or two above will make the plants safe from cut worms.

Melon Aphids—This is one of the hardest insects to deal with. A soap and tobacco wash is recommended. Fumigation with carbon bisulphid has been tried successfully; an air-tight bucket or other vessel is turned over the plant and about a teaspoonful of the chemical evaporated underneath.

Striped Cucumber Beetles—As soon as these beetles appear spray the plants heavily every few days with Bordeaux mixture and arsenate of lead. Where only a few hills of cucumbers, squash, pumpkins or melons, which are most commonly attacked by these beetles, are planted, the safest way is to protect the plants with small frames covered with cheese cloth. These must be on before the beetles get a chance to attack the plants, and should be left on until they are too large for the limited space within the frames.

Root Maggots—Use carbolic acid emulsion or white hebebores. Pour directly upon the growing plants, and around the roots of such plants as cabbage every week from the time they are set out until about the end of June.

Cabbage Worms—Dust the plants thoroughly, when the dew is on, with Paris green and flour in the proportion of 1 pound of Paris green to 50 pounds of flour. Arsenate of lead, 3 pounds to 40 gallons of water and 2 or 3 pounds of fresh air slaked lime may be sprayed over the plants instead of dusting them with Paris green and flour. After the cabbage heads have begun to form use fresh pyrethrum powder, spraying it over the plants, instead of using Paris green.

Flea Beetles—Spray the plants with poison Bordeaux mixture. In order to get the spray to adhere to the smooth surface of the plants it may be necessary to add a sticker. This may be made by boiling together 2 pounds of resin, 1 pound of soda and 1 gallon of water, boiling in an iron pot in the open until a clear brown liquid is formed. This may require from one to two hours. This sticker is sufficient for 40 gallons of the Bordeaux.

Colorado Potato Beetle—Spray with Paris green or arsenate of lead combined with Bordeaux mixture.

In fighting any insect pest it should be understood that prevention is always easier than cure. Clean cultivation and crop rotation will do much toward lessening the danger from insects. After "the bugs" do appear, the fight against them must be won at once, if at all.

Broke His Leg.

Charles Bellows, Jr., the young son of Mr. and Mrs. C. D. Bellows, while trying to pole vault at home, broke his right leg above the ankle. The accident occurred at 7 o'clock Wednesday evening and was very painful.

Miss Teresa Bloom of Arkoe was a shopper in Maryville Wednesday.

MRS. MCGILL BROKE DOWN

Gives the Real Facts In Regard to Her Case and Tells How She Suffered.

Jonesboro, Ark.—"I suffered a complete break down in health, some time ago," writes Mrs. A. McGill, from this place. "I was very weak and could not do any work. I tried different remedies, but they did me no good."

One day, I got a bottle of Cardui. It did me so much good, I was surprised, and took some more.

Before I took Cardui, I had headache and backache, and sometimes I would cry for hours. Now I am over all that, and can do all kinds of housework. I think it is the greatest medicine on earth."

In the past fifty years, thousands of ladies have written, like Mrs. McGill, to tell of the benefit received from Cardui.

Such testimony, from earnest women, surely indicates the great value of this tonic remedy, for diseases peculiar to women. Are you a sufferer? Yes? Cardui is the medicine you need. We urge you to try it.

N. B.—Write to: Ladies' Advisory Dept., Chas. Rogers Medicine Co., Chattanooga, Tenn., for Special Instructions, and 64-page book, "Home Treatment for Women," sent in plain wrapper, on request.

Mr. Roy Hainey, who has been visiting in California this winter, is expected to return soon. Roy is one of Barnard's worthy young men and will find a hearty reception upon his return.

Mothers' Day was observed at the M. E. church Sunday morning. The pastor preached an appropriate sermon for the occasion which seemed to be very effective in bringing the thoughts of former days vividly before his hearers. Mrs. Robert Bridges sang a solo entitled "Tell Mother I'll Be There," and the choir sang choice songs suitable to the mothers present. Rev. Royston also asked them to go home and write their mothers a letter and tell them how well they loved them and appreciated their past kindness and goodness to them, and to thank God for those gone on to the place of reward.

Mrs. Adaline Truesdale left Wednesday evening for Edmond, Okla., to visit her sister, Mrs. Calhoun.

NOW'S THE TIME

SWAT THE BUG WHILE THERE'S A CHANCE TO WIN.

PREVENTATION IS BEST

Crop Rotation and Thorough Cultivation Lessens Danger—Formulas Effective in Eliminating Insects.

Following a rather open winter it is probable that insects may prove troublesome in the home garden and in truck patches. The following list of standard formulas, as recommended by various agricultural experiment stations, is sent out by the Missouri State Board of Agriculture at Columbia.

Kerosene Emulsion—Kerosene (coal oil), 2 gallons; rain water, 1 gallon; soap $\frac{1}{2}$ pound. Boil the soap in water until dissolved. While the mixture is boiling hot, turn it into the kerosene, stir for about five minutes and until it is of a smooth, creamy nature. Before using, dilute with nine times its measure of water. Three gallons of emulsion will make thirty gallons of wash.

Soap Wash—Concentrated potash lye, $\frac{3}{4}$ pounds; water, $\frac{7}{8}$ gallons; fish oil, 1 gallon. Dilute the lye in water; boil. To the boiling solution add the fish oil. Continue to boil for two hours and then allow to cool.

Carbolic Acid Emulsion—Carbolic acid, 1 pint; hard soap, 1 pound; water, 1 gallon. Dissolve the soap in the boiling water and while boiling add the acid and continue the boiling for a few minutes, stirring thoroughly. Put the emulsion away in a tightly closed vessel and label, "Stock Solution of Carbolic Acid—Poison." Before using, dilute one part of the stock solution with fifty parts of water.

Carbolized Plaster—Carbolic acid, 1 pint; air slacked lime, road dust, or some other diluting medium, 50 pounds. Sprinkle or dust on the plant in the dry state.

Tobacco Spray—Hard soap, 1 pound; water, 8 to 10 gallons, strong tobacco extract, 1 gallon. Dissolve the soap in boiling water, add the decoction and then make up 8 to 10 gallons.

White Hellebore—This is a powder which may be obtained at any drug store. The powder may be used or with water. Where water is used, 1 ounce to 2 gallons of warm water is the proper proportion.

Pyrethrum of Insect Powder—This powder is also called Dalmatian Insect Powder and Persian Insect Powder. Like Hellebore, it is obtained from plants. To be effective, the powder must be fresh. Where used in the liquid form, use 1 ounce to 3 gallons of water. In the dry form use 1 ounce to 5 ounces of cheap flour. Mix thoroughly, allowing it to stand over night in a closed tin box, then dust on the plants through a cheese cloth.

Poisoned Bran Mash—Mix $\frac{1}{2}$ pound of Paris green in 50 pounds of bran. The poison should be added to the dry bran little by little and stirred all the time until the mass is tinged with the green color. Then add water, sweeten with sugar or molasses until the mixture is sufficiently moistened to crumble nicely through the fingers.

Paris Green and Bordeaux Mixture—4 pounds of fresh lime, 4 pounds of bluestone and 4 ounces of Paris Green. Thoroughly mix in 40 gallons of water. The bluestone (copper sulphate) should be dissolved by suspending it in a wooden vessel containing four or five gallons of water, and the lime slaked in another vessel. If lumpy, the lime should be strained through coarse sacking. Pour the bluestone into a barrel and half fill with water. Dilute the slaked lime to a half barrel and mix the two together. The Paris Green should be made into a paste with warm water, poured into the barrel and stirred thoroughly. The mixture is then ready for use. The addition of the lime prevents the poison from scorching the foliage.

Arsenate of Lead—Arsenate of soda, 10 ounces; acetate of lead, 24 ounces; water, 150 to 200 gallons. The arsenate of soda and the acetate of lead

GIRLS ARE SHORT

NOT IN STATURE, BUT IN NUMBER ENUMERATED.

TOTAL DECREASE 34

Over Half of Total White Females—Decrease in Colored Children Accounted for by One Family.

The enumeration of the school children of the ages from 6 to 20 of the Maryville school district has just been completed by J. W. Ray and shows that there are 1,212 school children. As compared with the enumeration of 1912, it is a decrease of 34, as the enumeration for 1912 was 1,246.

The number of white males are 587, the number of white females 594. The number of colored males are 11, and the colored females are 20. As compared with 1912, the white males were 592, or an increase of five over this year, and the white females were 612, or an increase of 18 over this year.

The colored enumeration also fell off this year, being 31 as compared to 42 in 1912. One reason for the decrease in colored enumeration is that the Page family composed of twelve children have moved away from the city.

The enumeration for the past several years has not shown much of an increase.

Ballard against Adolphus O. Mason. The first suit says that the plaintiffs entered into a contract of purchase and did buy of the defendant a number of acres of land and paid \$24,076, or \$107 for 225 acres of land. The petition alleges that the survey was made inaccurate and was only approximate and because of the mistake and misinformation as to the correctness of the survey, the plaintiffs overpaid defendant in the sum of \$280.50. This amount is asked for. There is also a second count in the petition filed for \$280.50.

The second suit filed was by the First National realty and loan company and James L. Ballard against Mr. Mason. In this petition, the plaintiffs claim that the defendant leased 221 acres of land from plaintiffs and at divers times in 1912, the defendant committed waste by removing frame barns, barb wire fence, grain sheds, aggregating to \$542.50. One that appears to be the best production there, is an old Egyptian water carrier, we presume, although no title appears, by Bertha Hewitt Woolrych. Margaret Holmes Irish has quite a number of pictures that are of excellent merit, "A Garden Nook," "When the Frost is on the Pumpkin and the Fodder's in the Shock," being among them.

POLITICAL NOTES.

Governor Major was raised on a Missouri farm and still prefers to travel behind a good team, hence his action in vetoing the appropriation of \$4,000 for an automobile for his personal use.

Predictions of good crops and continued prosperity sound mighty good to everybody except those of our Republican friends who warned the country last fall that everybody would have to go to the poor house if a Democratic president and Congress should be elected.

President Wilson was the first chief executive of any nation to recognize the Chinese Republic and extend to it the glad hand. It is the Democratic way. The Taft administration should have done this duty and would have done it but for the fact that American bankers wanted action deferred until a certain unsavory financial deal could be put through.

More money will be spent for schools and roads in Missouri during the next two years than during any other like period in the state's history, and all this without any increase in the rate of taxation. The Democratic party always has made good.

That noise you hear, Bill, is an echo from Armageddon. A gentleman by the name of Roosevelt is disturbing the peace of that famed resort because his hand-made political organization is being swallowed up—body boots and breeches—by tariff barons and other malefactors of great wealth.

One of the Journal's exchanges says that about all that is now left of the third term candidate for president, Col. Theodore Roosevelt, is wind and teeth. The teeth are left all right, but the wind was completely knocked out of him by the votes at the recent election.—Hopkins Journal.

Mrs. Will Clemmons of Arkoe was in Maryville Wednesday.

The honor guest received several beautiful presents. A pink and white luncheon was served after the games. Those present were: Misses Teresa Shonley, Pauline, Lena and Mary Herwick, Mildred Binter, Hilda Lahr, Gertrude Kirch, Katherine Zech, Elizabeth Wilmes, Nora Ellerman, Messrs. Henry Upschulte, Ralph Price, John Lavelle, Will Schoonover, Paul Thompson, Will Whitney, Ivan Gordon, Will Blatter, Hubert Zech and Earl Sturm. The hostess was assisted by Miss Katherine Shonley and Miss Mary Herwick.

First Party of Season.

Maryville's social season opened auspiciously Wednesday afternoon with a domino party to nearly eighty guests at the home of Dr. A. B. Allen, when Mrs. Allen and her daughter, Mrs. M. L. Beattie, Mrs. F. W. Crow, Miss Della Grems and Miss Louella Grems were the hostesses. Mrs.

George Jay of Shenandoah, Ia., was introduced as the guest of Mrs. Beattie. One other out-of-town guest was in attendance, Mrs. John J. City Federation Meeting.

The first meeting of the City Federation of Women's clubs since its organization a month ago was held at the library on Wednesday afternoon and plans discussed for the future work. The constitution and by-laws drafted by the committee, Mrs. W. B. Christy, Mrs. E. G. Orear and the federation president, Mrs. W. A. Rickenbrode, were ready and unanimously adopted. The Chairmen for three standing committees were appointed by the president; Mrs. Christy for the philanthropic work, Mrs. Eugene Ogden for the home economics, and Mrs. G. H. Colbert for the civics work. The report given by Mrs. Colbert of an address on civic improvement at the state meeting in Columbia last week by Mrs. Baxter of Kirksville was inspiring to the new federation and brought out an interesting discussion. It was decided to try to secure Mrs. Baxter to deliver an address in Maryville. Kirksville is said to have made greater improvement along civic lines than any other town in the state and Mrs. Baxter has been the prime factor in the work. She is a successful speaker and worker, and is busy most of the time delivering speeches in Missouri and other states, telling how work along civic lines may be accomplished.

Clyde Middleton of this city took place at 7:30 o'clock Wednesday evening, May 14, at the home of the groom's father, Isaac Middleton, 1302 East First street, in the presence of quite a number of relatives and friends. Rev. Claude J. Miller of the First Christian church performed the ceremony. Attending the bride and groom were Mr. and Mrs. Will Carmean of Bedford. The bride was prettily attired in a dress of blue silk and she carried a bouquet of bride roses. A luncheon was served after congratulations from the guests, and during the social time that followed some excellent music was given by a five-piece orchestra composed of James, Albert and Charles Conklin, Albert Kane and Tom McMullen. The members of the orchestra also sang several songs, among them "Silver Threads Among the Gold," "Silvery Moon," and "Blue Bells of Scotland." Just before the wedding company dispersed the bride and groom were serenaded by about thirty of their friends from around town. Mr. and Mrs. Middleton are not at home to their friends at 1302 East First street. Those at the wedding were Isaac Middleton, Miss Ruby Middleton, Claude Middleton, Mrs. Joseph McMullen and children, Mr. and Mrs. Will Carmean and children of Bedford, Mr. and Mrs. John W. Coleman, Mrs. A. J. Harris and daughter Ursel; Mr. and Mrs. E. E. Our child is about to graduate. Preparations are being made for a general rejoicing, and now you parents are considering the subject of a suitable present to show how you appreciate your child's hard work.

We again will help you with a few suggestions, which we know he or she will approve of, and feel amply rewarded for their many hours of hard work.

A diamond set in a pretty gold ring would be very fine, but if you do not feel quite so opulent, a watch would doubtlessly give just as much pleasure.

We have many other suitable articles too numerous to mention, and a visit to our store will tell the tale.

Tea for Pickering Mothers' Club.

One of the nicest social affairs Pickering has had for some time was the tea given Tuesday afternoon from 3 to 4 o'clock by Mrs. C. G. McMillen on the lawn of her home to the Mothers' club and their friends at that place. Rugs, pillows and seats were arranged on the lawn for the comfort of the guests. Upon their arrival, Mrs. McMillen, assisted by Mrs. Gordon Swinford, Mrs. Lester Hood, Mrs. Ed Rickard, Mrs. Ben Ingles, Mrs. Henry Rutherford, Mrs. John McQuire, served tea and cakes from the small tables upon which dominoes were played during the afternoon. Kodak pictures of the guests were taken and also of the children present. Mrs. McMillen threw a generous supply of candy upon the lawn for the benefit of the children, who accompanied their mothers. A silver offering was taken and this will be applied to the equipment of the play grounds that the Mothers' club has just started a fund for, and a good sum was realized. The tea was given for that purpose and the club is grateful to Mrs. McMillen for the effort she made in starting the ball to rolling. All of the members of the club were present and each brought a guest, while the hostess invited several for the afternoon. The singing of Mrs. Roy Wolfers at various times was one of the pleasant features of the day. The officers and members of the club are as follows: Mrs. Howard Wray, president; Mrs. D. R. Crowson, first vice-president; Mrs. W. R. McKee, second vice-president; Mrs. John McGuire, secretary; Mrs. George Smith,

(sugar of lead) should be dissolved separately and then poured into a tank containing the required amount of water. A white precipitate of lead arsenate is immediately formed, and when thoroughly stirred is ready for spraying. Its finely divided condition keeps it in suspension for hours and thus simplifies the work of spraying.

Common Insects.

Cut Worms—Cut worms do most damage to plants soon after they are set out in the spring. They also get in their work in June and July, there being several kinds of cut worms. The best way to get rid of the worms is to sprinkle poison mash over the ground about sundown. In setting out tomato plants a piece of paper wrapped about each plant so as to extend slightly beneath the soil and an inch or two above will make the plants safe from cut worms.

Melon Aphids—This is one of the hardest insects to deal with. A soap and tobacco wash is recommended. Fumigation with carbon bisulphid has been tried successfully; an air-tight bucket or other vessel is turned over the plant and about a teaspoonful of the chemical evaporated underneath.

Striped Cucumber Beetles—As soon as these beetles appear spray the plants heavily every few days with Bordeaux mixture and arsenate of lead. Where only a few hills of cucumbers, squash, pumpkins or melons, which are most commonly attacked by these beetles, are planted, the safest way is to protect the plants with small frames covered with cheese cloth. These must be on before the beetles get a chance to attack the plants, and should be left on until they are too large for the limited space within the frames.

Root Maggots—Use carbolic acid emulsion or white hellebore. Pour directly upon the growing plants, and around the roots of such plants as cabbage every week from the time they are set out until about the end of June.

Cabbage Worms—Dust the plants thoroughly, when the dew is on, with Paris green and flour in the proportion of 1 pound of Paris green to 50 pounds of flour. Arsenate of lead, 3 pounds to 40 gallons of water and 2 or 3 pounds of fresh air slaked lime may be sprayed over the plants instead of dusting them with Paris green and flour. After the cabbage heads have begun to form use fresh pyrethrum powder, spraying it over the plants, instead of using Paris green.

Flea Beetles—Spray the plants with poison Bordeaux mixture. In order to get the spray to adhere to the smooth surface of the plants it may be necessary to add a sticker. This may be made by boiling together 2 pounds of resin, 1 pound of soda and 1 gallon of water, boiling in an iron pot in the open until a clear brown liquid is formed. This may require from one to two hours. This sticker is sufficient for 40 gallons of the Bordeaux.

Colorado Potato Beetle—Spray with Paris green or arsenate of lead combined with Bordeaux mixture.

In fighting any insect pest it should be understood that prevention is always easier than cure. Clean cultivation and crop rotation will do much toward lessening the danger from insects. After "the bugs" do appear, the fight against them must be won at once, if at all.

Broke His Leg.

Charles Bellows, Jr., the young son of Mr. and Mrs. C. D. Bellows, while trying to pole vault at home, broke his right leg above the ankle. The accident occurred at 7 o'clock Wednesday evening and was very painful.

Miss Teresa Bloom of Arkoe was a shopper in Maryville Wednesday.

MRS. MCGILL BROKE DOWN

Gives the Real Facts In Regard to Her Case and Tells How She Suffered.

Jonesboro, Ark.—"I suffered a complete break down in health, some time ago," writes Mrs. A. McGill, from this place. "I was very weak and could not do any work. I tried different remedies, but they did me no good."

One day, I got a bottle of Cardui. It did me so much good, I was surprised, and took some more.

Before I took Cardui, I had headache and backache, and sometimes I would cry for hours. Now I am over all that, and can do all kinds of housework. I think it is the greatest medicine on earth."

In the past fifty years, thousands of ladies have written, like Mrs. McGill, to tell of the benefit received from Cardui.

Such testimony, from earnest women, surely indicates the great value of this tonic remedy, for diseases peculiar to women. Are you a sufferer? Yes? Cardui is the medicine you need. We urge you to try it.

Mothers' Day was observed at the M. E. church Sunday morning. The pastor preached an appropriate sermon for the occasion which seemed to be very effective in bringing the thoughts of former days vividly before his hearers. Mrs. Robert Bridges sang a solo entitled "Tell Mother I'll Be There," and the choir sang choice songs suitable to the mothers present. Rev. Royston also asked them to go home and write their mothers a letter and tell them how well they loved them and appreciated their past kindness and goodness to them, and to thank God for those gone on to the place of reward.

Mrs. Adaline Truesdale left Wednesday evening for Edmond, Okla., to visit her sister, Mrs. Calhoun.
